

200 SERIES

TOYOTA LANDCRUISER

SUSPENSION UPGRADES

AB0981

Heavy duty upper control arm to increase clearances and provide further allowance for steering geometry correction.

AB0072HD

Heavy Duty, high articulation, greasable ball joint for superior longevity and suspension travel.

AB0914

Extended greasable ball joint to assist with correcting camber and clearances on lifts upwards of 60mm+.

AX0367

Diff Drop Kit to correct drive shaft angles with raised suspension.

AT0961

Adjustable panhard rod with rubber OE spec bushings to correct track with suspension lift.

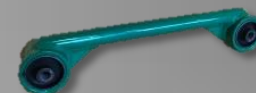

AT1227

Heavy duty fixed length lower control arm for increased strength with OE spec rubber bush.

AT1228

HD upper control arm with offset bushings to provide clearance to factory fuel tank when using extended shock absorbers – one arm required. Finished in black e-coating.
